Connection Guide

We know it's not always easy to understand technology....

So here's a rear desktop computer connection guide for your convenience!

- ✓ Most computer plugs are colour coded and will only plug in one way. Please pay special attention to the way they do plug in so as not to damage them by force.
- ✓ USB plugs can go into any USB socket.
- ✓ If you have two blue video sockets on the back of your computer, the horizontal plug (PCI-E Video Card) will take precedence over the vertical plug (onboard video).
- ✓ Speakers connect to the green socket.
- ✓ Microphone connects to the pink socket.
- ✓ Your internet will usually connect to the large square hole that resembles a large telephone socket called "Ethernet".
- ✓ If you have dialup internet, you will have a modem with a small telephone plug.
